

WEEK 3 STATUS REPORT

CCP-CNS2026 — Problem 1: Multi-Site Enterprise Network

Team Members: Rohma, Muqadas, Ahmad

Instructor: Sir Tahir Mehmood

TASKS COMPLETED THIS WEEK:

1. Configured ACL (SALES_SECURITY) on Router

- Blocks Kali attacker IP (192.168.10.50)
- Blocks Sales VLAN from Admin VLAN
- Allows all other traffic

2. Verified Web Server is working

- Apache HTTP server running on 192.168.30.100
- Successfully accessed from PC2-Engineering

3. Simulated DoS Attack

- Kali-Attacker sent 1000 ping packets to web server
- All packets blocked (100% loss)
- Attack captured in Packet Tracer Simulation mode

4. Verified Mitigation

- ACL SALES_SECURITY blocking all attack traffic
 - Kali cannot reach web server or Admin VLAN
 - Engineering and Admin VLANs unaffected
-

SECURITY TEST RESULTS:

PC1-Sales → Admin (192.168.30.10): BLOCKED ✓

Kali-Attacker → Web Server: BLOCKED ✓

PC2-Engineering → Admin: ALLOWED ✓

PC2-Engineering → Web Server: ALLOWED ✓

ACL CONFIGURATION:

SALES_SECURITY:

- Line 10: deny ip host 192.168.10.50 any
 - Line 20: deny ip 192.168.10.0/24 to 192.168.30.0/24
 - Line 30: permit ip any any
-

PLAN FOR NEXT WEEK:

- Final cleanup of all configurations
- Performance testing
- Prepare all files for final submission
- Begin writing final report
